Summary Additions to the requirements that all proposals for development should include.

Comment CPRE Sussex considers that all proposals for development should be required to

-Maximise opportunities to mitigate, adapt and improve resilience to climate change;

-Maximise opportunities for cycling and walking, including multi user routes and, where possible, facilitate circular routes; cycle paths should not be designed in ways that create barriers to the movement of wildlife or that lead to the fragmentation of habitats, and

-Support health and wellbeing and improve opportunities for understanding and enjoyment of the countryside, and of green spaces within built areas.

Proposed Change Add to the requirements that all proposals for development should include the following three requirements:

-Maximise opportunities to mitigate, adapt and improve resilience to climate change;

-Maximise opportunities for cycling and walking, including multi user

routes and, where possible, facilitate circular routes; cycle paths should not be designed in ways that create barriers to the movement of wildlife or that lead to the fragmentation of habitats, and

-Support health and wellbeing and improve opportunities for understanding and enjoyment of the countryside, and of green spaces within built areas.
